Subject: Contraception coverage mandate
Date: Thursday, September 29, 2011 7:30:16 PM

#1. I would like to voice my opposition to the coverage of contraceptive drugs and sterilization services to the mandated health care plan. None of these services are preventing any disease. Rather they interlope in the natural and potentially life-giving response of a woman's body. These drugs actually cause harm to a women's body. Why are HRT drugs bad and hormonal contraceptives good?

#2. I insist that the conscience clause be improved to recognize the fact that people of faith don't discriminate against whom they serve, we serve because we are people of faith and recognize the dignity of every human being at every level of life! It is despicable that the federal government would be calling us to discriminate against those in need or in our hiring practices!!

Thank you,
Julie Leber
